Executive Summary
Meeting of: Planning Commission Meeting
August 18, 2020 2:00 PM

Background:
Determine how many on-street and off-street parking counts we have in the City.

Overall Summary:
Existing parking around the City are generally non-standard and will need to be standardized and updated into the City Code. There is not enough off-street parking for businesses (estimated at 320 spaces).

After determining how many parking spaces are available in City limits, decide on any official handling of illegal parking, discussion with businesses of off-hour parking availability,

Key Take-Aways:
- With identified marked spaces, how do we deal with illegal parking
- With not enough parking for businesses, can we talk to businesses to offer their parking spots during their off hours
- Not enough parking for cars but no bicycle parking

Action Steps to be take (and who is responsible for them) by the next meeting:
- Parking standards updated into City Code (Holly)
- Parking signage for City Hall's business hours (Heather)
- How much parking we have both on/off street to lay into the GIS system (Justin/Holly)

Approved by both Deputy Recorder and Commission/Committee Chair:
